Mission Statement

THE GREENE COUNTY HIGHWAY DEPARTMENT EXISTS TO EFFECTIVELY MAINTAIN AND IMPROVE THE HIGHWAY AND BRIDGE INFRASTRUCTURE OF GREENE COUNTY, FOR THE EFFICIENT AND SAFE USE OF THE TRAVELING PUBLIC.

Mission Statement

THE MISSION OF THE GREENE COUNTY SOLID WASTE DEPARTMENT IS TO ACCEPT AND EFFICIENTLY DISPOSE OF THE MUNICIPAL SOLID WASTE STREAM, INCLUDING CONSTRUCTION AND DEMOLITION DEBRIS, AND TO PROCESS AND MARKET THE SOURCE SEPARATED RECYCLABLES GENERATED BY THE COUNTY'S RESIDENTS AND BUSINESSES.

Organizational Chart

Highway Dept. Highway JS In Graene County

Mileage of each class of highway in Greene County is as follows:

Class 1 – State Highways	220.88 miles
Class 2 – Controlled Access Highways	9.77 miles
Class 3 – State Thruways	23.83 miles
Class 4 – County Roads	262.52 miles
County Roads within Villages	3.70 miles
Class 5- Town Roads.

Bridge Structural Flags

New York State Department of Transportation administers an annual or bi-annual inspection of all publicly owned bridges located in Greene County. The Engineering Division receives from New York State Department of Transportation the inspection reports and any "Flag" information resulting from those bridge inspections. Red Structural Flags require immediate response in the form of a site inspection, by the County's General Consultant Engineer, and subsequent repair plan formulated and submitted to New York State Department of Transportation within 24 hours or 6 weeks from the initial notification, depending on the designated urgency of the flagged condition.

Yellow Structural Flags are reviewed and a proposed plan to effect repairs is formulated before the flagged condition worsens, resulting in a red flag.

The Engineering Division monitors all structural and safety flags received from New York State Department of Transportation and then updates the files in our Bridge Management database. In 2020, there were a total of 5 Structural Flags, 4 Yellow, and 1 Red.

The table below indicates the number of Red and Yellow Flags received over the past thirteen years:

YEAR	RED	YELLOW	
2020	1	4	
2019	2	9	
2018	5	10	
2017	1	9	
2016	5	11	
2015	3	18	
2014	6	14	
2013	10	19	
2012	12	11	Hurricane Irene
2011	5	23	August 2011
2010	1	21	
2009	10	23	
2008	4	10	

Deficient Bridge Status History From 2002 to 2020

A Bridge with an Overall General Recommendation of less than 5.0 is considered NOT to be performing as it was designed and is, therefore, considered "DEFICIENT". The term "DEFICIENT" does NOT mean, however that a Bridge is Unsafe. Currently there are 13 County owned bridges that are rated less than 5.0, down from 21 bridges in 2016. However, presently there are 24 older bridges that are rated a 5 and potentially dropping to a 4, in the very near future.

Annual Bridge Maintenance Money

From 2012 to 2020

2020 Sign Program

Pursuant to MUTCD requirements for management, the sign department utilizes the "Blanket Method Management System" where all signs are replaced along the entire county road. In 2020 three more county roads have had all new signs installed; for a total of 49 county roads that have had complete restoration with New High Intensity Prismatic Material, (HIPM) in an effort to conform with the national standard for control devices. This year, 797 signs were repaired or replaced, of which 394 were new HIPM signs because of Non-Reflectiveness. The Sign Department recycles all old signs that are taken down for Non-Reflectivity then reapplying new Prismatic Sheeting Material faces. This is a cost effective way to meet the new standards.

The Greene County Sign Department is responsible for over 15,000 road signs. These signs include Pedestrian Crossings, Hidden Driveways, School Bus Ahead, Signal Arrows and Chevrons. The Sign Department is also often called upon to design and implement complete highway closure detours for construction projects. These closures include bridges, paving, culvert replacements and road stabilization projects. In 2020, they installed two full detours, and multiple paving, and culvert detours for various projects, along with 16 pedestrian crossings. The Sign Department is also responsible for 240 miles of centerline striping, and 422 miles of edge line striping. With budgetary constraints, 236.44 miles of centerline and 349.54 miles of edge line were striped, in 2020.

Re-Striping of a Rail Road crossing along CR 28, along with the installation of new Right-to-Farm Signs, in New Baltimore.
